

HURRICANE RESPONSE

Company's emergency response procedures during hurricanes or other natural disasters:

PuroClean follows a tiered response system to ensure an efficient and scalable approach during hurricanes and other natural disasters:

Local Response

Our immediate focus is deploying our local team to assist affected properties, depending on accessibility and severity.

Statewide Support

If additional resources are needed, we coordinate with other **PuroClean franchise operators** across Florida to increase response capacity.

Regional Assistance

For widespread disasters, we bring in teams from the Southeast region to provide additional manpower and equipment.

National Deployment

In cases of catastrophic events, we leverage our nationwide network of **PuroClean franchises** to deliver large-scale recovery efforts.

Additionally, we have full support from **PuroClean's Corporate Office in Tamarac, FL**, as well as our partner company, Signal Restoration, which specializes in handling large commercial losses across the U.S. and Canada.

As part of our proactive approach, we develop a custom **Emergency Management Plan (EMP)** for each property. This plan helps both the building management and PuroClean gain a clear understanding of the property's operations and emergency procedures, ensuring a faster, more effective response to minimize secondary damage.
